

## WATER BARRIERS

# JERSEYBLOK LD WATER BARRICADE

The JerseyBlok LD Water Barricade is lightweight yet durable, designed for quick deployment, high visibility, and as a replacement for concrete Jersey barriers. With a filled weight of 653 lbs, it can be used as a channelizing device in high-traffic areas.

### WEATHER-RESISTANT

Heavy-duty, UV-resistant polyethylene resists fading or warping, even under harsh sunlight.

### CONCRETE ALTERNATIVE:

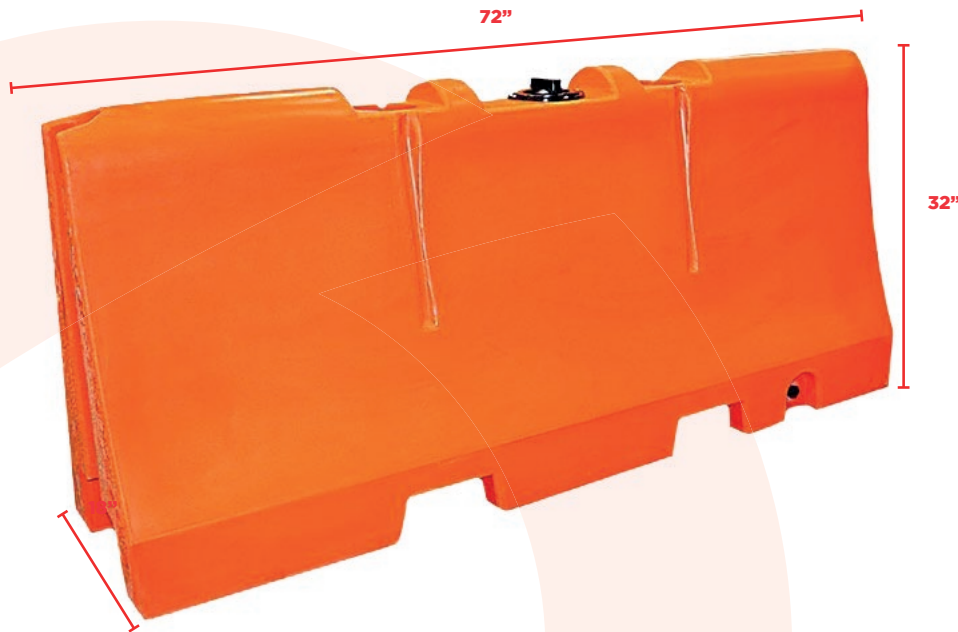

Weighing up to 653 lbs, you can use plastic barricades instead of concrete on many sites.

### VERSATILE DESIGN:

The swivel pin-and-lock system allows for 90° rotation, making it easy to create curved perimeters.

## SPECIFICATIONS

<b>SKU</b>	RRM3272
<b>Weight</b>	70 lbs.
